SUMMARY

A passionate and rigorous mathematician with sharp analytical reasoning, strong interpersonal skills, and a deep interest in AI (NLP/LLMs), cloud computing, and programming. I earned my engineering degree in 2019 and completed a Ph.D. in 2022, specializing in tensor algebra. Since then, I have taken on various complementary roles, including solution architect, AI engineer.

EDUCATION

Ph.D. in Applied Mathematics

Doctoral College of Bordeaux

📅 10/2019 – 12/2022 📍 Bordeaux/Toulouse, France

Title: Tensor-Train Approach for Inference in SBM (manuscript)

Engineering Degree in Applied Mathematics

Polytech'Lyon

📅 09/2016 – 08/2019 📍 Lyon, France

Preparatory Classes MPSI/MP

Lycée Paul Valéry

📅 09/2014 – 05/2016 📍 Paris, France

Certifications : AWS SAA / AWS ML

📅 2023 📍 Bordeaux

SKILLS

Programming Languages: Python, R, C++

Software and tools: Reactjs, Docker, Git

Database : Mongodb, Dynamodb, PostgreSQL

Libraries: Pytorch, Tensorflow, Keras, LLaMA

Boto3, Fastapi, Pymongo, Scikit-learn,...

Soft skills :

Collaboration with cross-functional teams,

autonomy and rigor in project management

Languages :

French (Native), Arabic (Native)

English (TOEIC 820), Spanish

Other :

- **Teaching** : Former OpenClassrooms mentor and Python teacher.
- **Founder of JadeVine AI** : AI-MRV platform that include mobile ([Apk link](#)) and web app ([available here](#)) plus research paper.

PROFESSIONAL EXPERIENCE

Data Consultant, EXPLEO

Projects : Gaia/Grace/Stay Fresh in Paris/Legalbot

📅 October 2023- Now

📍 Merignac

- **AI engineer**: Automation of legal query processing to reduce team workload.
 - **Action**: Development of a **multi-agent** backend for an LLM-powered chatbot.
 - **Result**: Reduced response time from 2 days to seconds, drastically lowering the legal team's workload.
- **Data science**: Optimization of ecological and complex textual data.
 - **Action**: Implementation of a full **RAG** process and training of ML/DL models.
 - **Result**: Achieved **81.33%** accuracy on RAG.
- **Data engineering** : development of NoSQL databases, ETL and APIs for two applications.
- **Stack**: Python, Docker, ReactJs, CI/CD, Neo4J, Kubeflow, Unsloth (QLoRA) Azure, MongoDB

Cloud Data Scientist, Mangrove

📅 January 2023- September 2023 📍 Bordeaux

- **Internal projects**: Participation in the development photo sharing software and predictive finance project.
- **Customer project**: Development of a Data pipeline for the automatic extraction of tables from documents (pdf/spreadsheets).
- **Stack**: AWS cloudformation/S3/Dynamodb/Lambda/Kubernetes/Sagemaker, Python, Git, Docker, OpenBB,

Ph.D. in Applied Mathematics

📅 October 2019 - September 2022 📍 Bordeaux and Toulouse

Unsupervised classification for species recognition based on distances between DNA sequence pairs and use of tensor algebra to enhance the SBM algorithm (**Python, R, Slurm, and Git**)

Internships:

📅 03/2019 – 09/2020 and 09/2017-01/2018

- **Final Year Internship**: OTU data clustering using SBM model at the MIA unit of INRAE Toulouse (**report**)
- **M2 Internship**: Estimation of population diffusion parameters at the BIOSP, INRAE Avignon (**Report**)

PUBLISHED PAPERS AND PROJECTS

- **Evaluating the adequacy between morphological-based and molecular-based inventories at high taxonomic level** co-written with Nathalie Peyrard and Alain Franc (**Molecular Ecology**).
- **Computing SBM marginals with TT decomposition** co-written with Nathalie Peyrard, Alain Franc and Olivier Coulaud.
