📍 Bordeaux, France

SUMMARY

A passionate and rigorous mathematician with sharp analytical reasoning, strong interpersonal skills, and a deep interest in AI (NLP/LLMs), cloud computing, and programming. I earned my engineering degree in 2019 and completed a Ph.D. in 2022, specializing in tensor algebra. Since then, I have taken on various complementary roles, including solution architect, data engineer and data scientist.

EDUCATION

Ph.D. in Applied Mathematics

Doctoral College of Bordeaux

📅 10/2019 – 12/2022 📍 Bordeaux/Toulouse, France

Title: Tensor-Train Approach for Inference in Stochastic Block Models, Application to Biodiversity Characterization (manuscript)

Engineering Degree in Applied Mathematics

Polytech'Lyon

📅 09/2016 – 08/2019 📍 Lyon, France

Preparatory Classes MPSI/MP

Lycée Paul Valéry

📅 09/2014 – 05/2016 📍 Paris, France

Certifications : AWS SAA / AWS ML

📅 2023 📍 Bordeaux

SKILLS

Programming Languages: Python, R, C++

Software and tools: Reactjs, Docker et Git/Gitlab

Libraries: Pandas, Scikit-learn, Tensorflow, Keras, Pytorch, Pymongo, Boto3, Fastapi, ...

Database : Mongodb, Dynamodb, Aurora,

Soft skills : Collaboration with cross-functional

teams, autonomy and rigor in project management

LANGUAGES

French and Arabic
English (TOEIC 820)
Spanish

PROFESSIONAL EXPERIENCE

Data Consultant, EXPLEO

Projects : Gaia/Grace/ Stay Fresh in Paris/ /Legalbot

📅 October 2023- Now

📍 Merignac

- **Data science** : Integration of LLMs (Large Language Models) and use of ML/DL on ecological data. Technologies: **Python, Azure OpenAI, Kubeflow**
- **Data engineering** : development of NoSQL databases, ETL and APIs for two applications. **Python, Azure CosmosDB, MongoDB**
- **AI engineer** : Development of the backend of an LLM powered chatbot in the legalbot project : **Python, Docker, ReactJs**

Cloud Data Scientist, Mangrove

📅 January 2023- September 2023 📍 Bordeaux

- **Internal projects**: Participation in the development photo sharing software (**AWS cloudformation/S3/Dynamodb, Python, Git**) and predictive finance project (**AWS SAM/S3/Dynamodb, Docker, Python, OpenBB**)
- **Customer project**: Development of a Data pipeline for the automatic extraction of tables from Technos documents: **Sagemaker, Python, AWS Lambda/ Kubernetes**

Ph.D. in Applied Mathematics

📅 October 2019 - September 2022 📍 Bordeaux and Toulouse

Title: Statistical learning for OTU (Operational Taxonomic Unit) identification and biodiversity characterization.

- Unsupervised classification for species recognition based on distances between DNA sequence pairs (**R and Git**)
- Use of tensor algebra to enhance the stochastic block models algorithm (**Python, Slurm, and Git**)

Internships:

📅 03/2019 – 09/2020 and 09/2017-01/2018

- **Final Year Internship**: OTU data clustering using SBM model (Keywords: statistical learning, data analysis) (**Git, Python, and R**) at the MIA unit of INRAE Toulouse (report)
- **M2 Internship**: Estimation of population diffusion parameters in a heterogeneous landscape (Inferential statistics, data analysis, Optimization) (**Freefem++ and R**) at the BIOSP unit of INRAE Avignon (Report)

PUBLISHED PAPERS AND PROJECTS

- **Evaluating the adequacy between morphological-based and molecular-based inventories at high taxonomic level** co-written with Nathalie Peyrard and Alain Franc (Molecular Ecology resources).
- **Computing SBM marginals with TT decomposition** co-written with Nathalie Peyrard, Alain Franc and Olivier Coulaud.(Hal INRIA)
- **Personal project**: NextGenCv, CV and skills file creation software based on LLMs.
